Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 9 (currently amended) The image pickup apparatus according to claim 8 ~~5~~, further comprising a frame rate changing section for changing the frame rate in accordance with the amount of the shaking motion, wherein the frame rate indicates the number of the plurality of frames representing the static image taken per unit time.

Claim 10 (currently amended) The image pickup apparatus according to claim 5, ~~further comprising a~~ **wherein the** resolution changing section for changing a resolution of the plurality of frames in accordance with a brightness.

Claim 11 (currently amended) The image pickup apparatus according to claim 10, ~~further comprising a~~ **wherein the** resolution changing section for changing a resolution of the plurality of frames in accordance with a zoom ratio.

Claim 12 (currently amended) The image pickup apparatus according to claim 5, wherein [:] the shaking motion detecting section detects the amount of the shaking motion based on a summation of information indicating a plurality of pixels included in the image pickup plane of the image pickup element, and the shaking motion correcting section corrects the plurality of

frame information by cutting out a part of the plurality of frame information in accordance with the amount of the shaking motion.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 5 and 15, the Prior Art of record fails to anticipate or to make obvious a method and an image pickup apparatus for taking a static image during a predetermined exposure period, comprising a shaking motion detecting section for detecting an amount of shaking motion between a plurality of frames representing the static image; a shaking motion correcting section for correcting a plurality of frame information indicating the plurality of frames by setting a number of virtual pixels included in each of the plurality of frames to be larger than a number of actual pixels included in an image pickup plane of an image pickup element in accordance with the detected amount of the shaking motion, wherein the number of virtual pixels is set based on a ratio of a predetermined actual pixel size to the amount of shaking motion between the plurality of frames; a storage section for storing the plurality of frame information subjected to the correction of the shaking motion; an information generating section for generating static image information indicating the static image based on the plurality of frame information stored in the storage section; and a resolution changing section for changing a set resolution of the plurality of frames in accordance with the amount of shaking motion, wherein the set resolution is reduced to a predetermined resolution, after which, a frame rate for taking the plurality of frames is increased.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2622

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
